

CA Project & Portfolio Management

Overview

Let Project and Portfolio Management (PPM) from CA Technologies empower you to manage your entire innovation lifecycle and deliver projects faster. With CA Technologies CA Clarity™ PPM solution, you can deliver consistently and predictably for increased agility and innovation. IT resource optimization and planning are designed to help you make smarter portfolio decisions and IT financial management capabilities support investment decision making. In addition, CA Clarity PPM is available on demand and is supported by our industry-leading software-as-a-service infrastructure.

Challenge

As a CIO today, you are now responsible for driving innovation across your IT portfolio to navigate through your organization's biggest challenges. Your program managers are taking on more sophisticated projects such as supporting a mobile workforce, creating a more secure environment for social media, supporting Agile development, or taking advantage of technology as a service and cloud-based services. However, manual processes, silos of resource management, and disparate systems prevent good governance when executing a strategic vision. To align IT with business goals, you need to collaborate with your stakeholders on ideas and projects. You need to determine the right mix of IT services to enable the right resources to deliver the best results that will meet business requirements and achieve your expected financial goals. These challenges are exaggerated without one view of all projects in your portfolio; a view that leads to faster decisions and accelerated time to value.

Opportunity

Project & Portfolio Management from CA Technologies gives IT business leaders the confidence to innovate. This integrated solution enables you to capture and collaborate with your customers on the next big idea, determine the right portfolio mix, scope requirements, develop while using traditional and Agile methods together, and manage IT investments as planned. Throughout this innovation lifecycle, costs are tracked, schedules are managed, and resources are optimized.

Benefits

Project & Portfolio Management from CA Technologies helps IT organizations deliver innovation to the business, optimize IT resources, and improve return on investment, giving you the enhanced vision to select the RIGHT ideas and make the RIGHT decisions to deliver the RIGHT products and services at the RIGHT time.

CA Project & Portfolio Management (PPM) Drives Innovation

The Project & Portfolio Management solution from CA Technologies is designed to help you manage your innovation lifecycle, linked from strategic planning through execution. Whether you are a CIO, a program manager, or an IT application developer, this solution includes capabilities that specifically address your unique needs, yet integrate information in one central solution for executive visibility across your entire IT portfolio.
