

Custom On-Demand Training for CA Clarity

One Topic – 3 On-Demand Solutions

CA CLARITY ON-DEMAND TRAINING

Frequently, Classroom Training is not the best solution to providing the necessary CA Clarity and PMO process information and skills required for peak efficiency in performing organizational roles that utilize Clarity. An alternate approach utilizes a combination of three On-Demand training components (QRC, CBT, and CAPA) to provide the best as-needed end results at the lowest price point. Key reasons for this include;

- The need for On-boarding Training for new employees and contractors
- Difficulty in finding time to devote to classroom training
- The need for just-in-time training
- The sheer number and cost for the training class approach

xPPM Education offers CA Clarity On-Demand Training that eliminates these gaps. The training is customized to your environment and processes, is in short and concise topics of a recorded video CBT, associated Quick Reference Card, and the associated CAPA topics (if applicable). And it can be produced for inclusion within a Learning Management System or as stand-alone web-based training.
